73mm x 35mm x (window depth) 12mm

73mm x 44mm x (window depth) 19mm

Material/s

Face: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to it's wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

Back: 100% recycled plastic back (black or white)
