- Minimum order quantity of 25 units

## Size/s

Bespoke: Any shape or size up to 60mm x 30mm

## Fitting/s

- Keyrings have a metal jump ring to a 24mm nickel split ring as standard

## Material/s

**Metal Keyring:** All our steel is part recycled material and the environmental benefits of steel include the fact that the material can be recycled with ease anywhere in the UK. We make all of our keyrings at our factory from steel sheets for the lowest possible carbon footprint. Our zero-waste component manufacturing allows for the sale of all excess steel from our factory for recycling, the sale of which is all spent on purchasing Gold Standard carbon offsets. At end of life our stainless steel keyrings can simply be put into any metal recycling. Scrap steel sales form a large part of our 100 tonnes of carbon reduction target for 2022. Simply by choosing our stainless steel keyrings you will be not only choosing an easily recycled item made from part recycled material but that purchase will be making a positive contribution to environmental projects.
